Übersicht/Invited Review

Heidenberger K: Strategic investment in preventive health care: quantitative modelling for programme selection and resource allocation 1

Theoretische Arbeiten/Theoretical papers

Aalst WMP van der: Petri net based scheduling 219
Bai SX, Burhanpurwala JH, ElHafsi M, Tsai Y-K: Hierarchical production control for a flow shop with dynamic setup changes and random machine breakdowns 81
Bai SX, Gershwin SB: Scheduling manufacturing systems with work-in-process inventory control: reentrant systems 187
Brucker P, Thiele O: A branch & bound method for the general-shop problem with sequence dependent setup-times 145
Burhanpurwala JH → Bai SX
Čepar D → Motnikar BS
Costa D, Silver EA: Exact and approximate algorithms for the multi-period procurement problem where dedicated supplier capacity can be reserved 197
Dragan I, Driessen T, Funaki Y: Collinearity between the Shapley value and the egalitarian division rules for cooperative games 97
Driessen T → Dragan I
ElHafsi M → Bai SX
Funaki Y → Dragan I
Gau T → Wäscher G
Gershwin SB → Bai SX
Goberna MA, Jornet V: On Haar's dual problem 209
Haase K: Capacitated lot-sizing with sequence dependent setup costs 51
Jornet V → Goberna MA
Klehmet U: Modelle zur Parameteroptimierung von Timed Token Rotation-Protokollen 169
Mohan SR, Neogy SK: Generalized linear complementarity in a problem of *n*-person games 231
Motnikar BS, Pisanski T, Čepar D: Time-series forecasting by pattern imitation 43
Neogy SK → Mohan SR
Pisanski T → Motnikar BS
Silver EA → Costa D
Sotskov YN, Tautenhahn T, Werner F: Heuristics for permutation flow shop scheduling with batch setup times 67
Tautenhahn T → Sotskov YN
Thiele O → Brucker P
Thon D, Thorlund-Petersen L: On the congruence between consumer tastes and market prices 163
Thorlund-Petersen L → Thon D
Tsai Y-K → Bai SX
Wäscher G, Gau T: Heuristics for the integer one-dimensional cutting stock problem: a computational study 131
Werner F → Sotskov YN

OR Software

Foerster H: DATA (DOS) 61
Hempel K → Kolisch R
Kolisch R, Hempel K: CA-SuperProject 127

Anwendungsorientierte Arbeiten/Application-oriented papers

Berg M, Eisenberger R: An experiment on the evaluation of information under risk and ambiguity 179
Böttcher L → Salewski F
Drexl A → Salewski F
Eisenberger R → Berg M
Fleischer K, Folda R: Einsatzmöglichkeiten des Bootstrap-Verfahrens bei der Bonitätsprüfung 107
Folda R → Fleischer K
Loinjak S → Schneeweiß C
Müller G → Schneeweiß C
Salewski F, Böttcher L, Drexl A: Prüffeldorientierte Zuordnung von Prüfern für die operative Personaleinsatzplanung in Wirtschaftsprüfungsgesellschaften 29
Schneeweiß C, Loinjak S, Müller G: Festlegung einer Jahresarbeitszeitverteilung durch Optimierung von Schichtplänen 15
Steurer E: Prognose von 15 Zeitreihen der DGOR mit Neuronalen Netzen 117

Indexed/Abstracted in
CompuMath Citation Index, Inspec, International Abstracts in Operations Research, Journal Contents in Quantitative Methods, Mathematical Reviews, Research Alert, SciSearch, Statistical Theory and Method Abstracts, Zentralblatt für Mathematik
